## MILK COOLING TANKS

**100 - 300 L**

You can store and protect the milk healthily milked with TULSAN  
Cooler tanks. TULSAN Cooler tanks are manufactured with  
304 stainless steel and produced by using the highly qualified  
evaporator and cooling units. It helps the tank to be washed  
effectively with demountable stainless butterfly valve.  
You can find more information about TULSAN Cooling tank  
models at section Milking Systems and Components.

### MODERN LASER TECHNOLOGY

Her soğutma tankının kalbi olan evaparator üstün lazer teknolojisi ile kaynaklanmıştır. Evaparatorün özel tasarımı, onun tanka montajı, kullanılan malzemelerin uygun seçilmesi, elmas kaliplar vs. bütün bunlar enerji kaybını en aza indirmek, sıfır soğutucu sızıntısı ve sütün ısısının buzlanmayı önlemek üzere hızlı şekilde dağıtilması için yapılmıştır.
